

Sheffield Veterinary Hospital Services

Sheffield Veterinary Hospital is a complete veterinary hospital with services ranging from general medical care, preventative medicine, surgery, radiology, dentistry and diagnostic services for dogs and cats. Our four veterinarians bring a wide-range of expertise to provide your pet the best professional and medical care that you would want for them.

Our doctors and staff treat each patient as if they were their own. We want the best medical care for all of our "pets". We pride ourselves in being a loving and caring medical group with the professionalism that you would expect from your own doctor.

Emergency Center

To find out more about our referral to the local specialty / emergency center in Columbus;

Boarding

Sheffield Veterinary Hospital has a complete boarding facility within the hospital that is supervised by the doctors. If your pet has special needs like medications daily or extra time to exercise, we can accommodate it with our activities log for each boarder.

All pets have their own feeding schedule depending on their needs as well as full walks twice a day. Baths can be provided at the end of the boarding time with just a simple request. We know your time away is important to you and we want you to be comfortable knowing your loved one is with great care.
